

What do we do?

Resist

We **resist** complicity and complacency within Higher Education that upholds business as usual. We **resist** the corporatisation and commercialisation of Higher Education. We **resist** narrow, technosolutionist curricula that fail to adequately address the planetary crisis and climate justice or to consider the breadth and diversity of understandings of our world.

Reclaim

We **reclaim** the common good mission of higher education. We **reclaim** the public infrastructure of higher education by sharing resources, and fostering collaboration rather than competition. We **reclaim** the university as a place of deliberative democracy.

Restructure

We **restructure** research, learning, community engagement, and policy influence to reimagine the Higher Education and to support transformation toward an inclusive, non-extractive and non-exploitative future.
